PROJECTS

1. ASOS.com | ⊕ | 🔘
HTML5 | CSS3 | Responsive Web Design | JavaScript | Node.js | Git | React

- Implemented a responsive web design using HTML5 and CSS3, ensuring a seamless user experience across devices.
- Developed advanced search and filtering options using JavaScript and React, enhancing user navigation.
- Integrated server-side APIs with Node.js to manage product data and user information.
- Implemented customer review and rating system to provide user feedback on products.
- Utilized Git for version control and collaborative development.

2. University | ⊕ | 🔘
JavaScript | React | Git | Node.js | MongoDB | HTML5 | CSS | Responsive Web Design | Django

- Created a comprehensive school website using JavaScript, React, and Node.js for a responsive and dynamic user experience.
- Developed a secure student portal with Node.js and MongoDB to manage student grades and schedules.
- Implemented dynamic content updates and interactive features such as contact forms using JavaScript.
- Optimized the website for accessibility and cross-device compatibility, ensuring a wide reach.
- Utilized Git for version control and collaborative development workflows.
